Jaipur, Rajasthan, India

## OVERVIEW

Medhini Oryktos is a company that specializes in exports and imports, aiming to facilitate seamless international and domestic trade. We provide strategic consulting services across various sectors, including minerals & agriculture. Our vision is to be a hub of innovative solutions, supporting the growth of new and small enterprises through collaboration and innovation. Medhini Oryktos also emphasizes social responsibility and sustainability in their operations.

## OUR DOMAINS

**MINERALS**

**AGRICULTURE**

# MEDHINI'S MINEROLOGY

Medhini Oryktos., based in the mineral-rich state of Rajasthan, India. Known for its diverse mineral deposits encompassing over 70 different types, Rajasthan presents a unique opportunity for various industries including ceramics, paints, glass, tableware, slabs, electronics, and more.

## HOW WE WORK

MINING

STOCK

TRANSPORTATION

PROCESSING

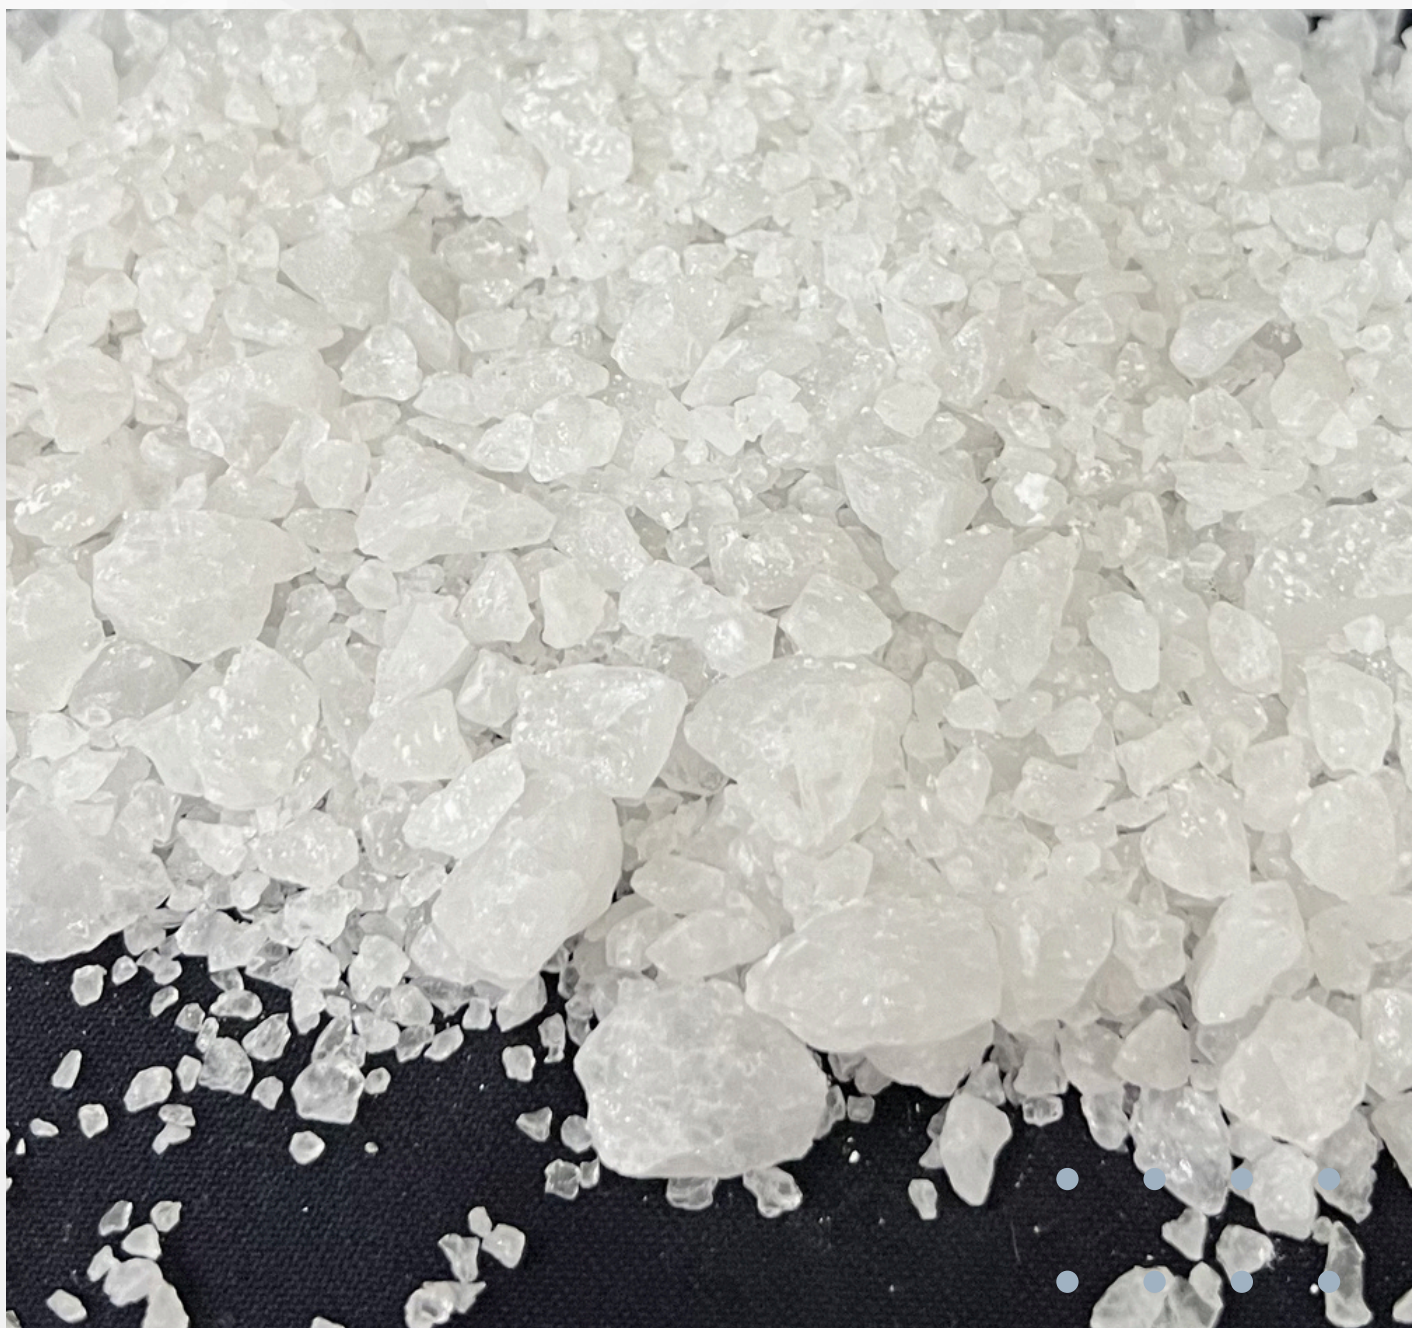

PACKING

SHIPMENT

# QUARTZ

MO/Q/001

We offer quartz for the making of slab, ceramics, semi-conductor, crucible and solar panels and many more. Rajasthan is one of the largest producers of Quartz. Quartz is found in different lusters including glassy, off white and opaque.

# FELDSPAR

MO/F/001

We provide a comprehensive range of Feldspar in Sodium and Potassium. We offer Lumps, Powder and Granules in each category. Feldspar can be used in making of ceramics, tableware, slabs, paint, glass and other industries.

# MICA

MO/M/001

---

Mica scraps, Mica flakes, Mica blocks, Mica powder are in our product list of Mica category. We supply right product sourced from its natural origin to ensure consistent supply and competitive price.

# IRON ORE

MO/IO/001

---

Hematite iron is available in both, Lumps and grains to fulfil requirement ranging from small to bulk orders

# QUARTZITE

MO/QZ/001

---

Quartzite is available in form of Lumps and Grains. Silica ranging from 96% to 98% we supply in bulk quantity in domestic and international market.

# DOLOMITE

MO/D/001

---

Presence in Rajasthan State of India gives us advantage over dolomite. From Lumps to powder (200 Mesh, 325 Mesh) we have been supplying on a regular basis.

## MEDHINI'S R&D

At Medhini Oryktos., we are committed to pioneering advancements in geology by conducting comprehensive surveys to assess mineral availability. Our focus is on enhancing mineral quality by removing impurities and discovering innovative, cost-effective applications. Additionally, we are dedicated to the development of manpower and transportation solutions, integrated with cutting-edge IT services.

1. Geological Surveys for Mineral Availability
2. Reducing Impurities in Minerals
3. Enhancing fixed and variable factors of production
4. Streamlining Cargo Booking, Movements, and Tracking

## SOCIAL RESPONSIBILITY

We are performing our social responsibilities under the name of **Project Suraksha** by educating the unprivileged kids of India. We at Medhini believe that education is the key to success and wellbeing of the nation.

With a focus on education, where we started by teaching underprivileged children the basics—alphabets in both Hindi and English, along with foundational numeracy skills. Our daily visits to these communities have become a lifeline, offering these young minds the chance to build a strong educational foundation.
